Trees

Flowers

Wildlife

You can see many beautiful mosses in the gorge.

Fissidens spp.

They look like tail feathers of phoenix.

They are similar to leaves of Cedar.

Haircap moss

Japanese maple

Variety shapes and colors of red and yellow leaves well represent autumn in Japan.

Oct-Nov

You perceive sweet scent of cotton candy at the path from *Cercidiphyllum japonicum*.

It originates from maltol that old leaves contain.

Azalea

Many kinds of seasonal Azaleas color the walls of gorge.

May-Nov

Star shaped purple flowers greet you at the entrance in summer.

They grow at shady and wet place like valley.

Conandron ramondioides

Japanese giant salamander

Japanese giant salamander - One of the biggest amphibians in the world. They are protected as special natural treasure.

Ferns

Ferns are also shown as attracting diversity. You can see transparent Firmly fern on wet rocks.

Firmly fern

Mushrooms are wonders of nature. They are silently waiting for you under the bush.

Giant and mysterious old trees like **Japanese horse chestnut** are in the gorge. They show a part of primeval forest.

Japanese horse chestnut

Sep-Oct

You may see seeds like them in the photo below. "Tochimochi", rice cake mixed with it has been a popular preservative food in mountainous regions.

Hydrangea serrata

Small flowers at center are "real flowers". Large calyxes behave like petals.

Jul-Aug

Purple **Japanese wisteria** blooms in clusters. Fluffy carpenter bees often visit it.

Japanese wisteria

May-Jun

Listen carefully, a call like ring of bell is a call of a Ruddy kingfisher. They are good hunters at river side.

May-Sep

Forest green tree frog lay their eggs in foam at the beginning of summer (May-Jun).
